Mitochondrial Target-Based Drug Discovery

Message from the Guest Editors

Compared to healthy cells, cancerous ones catabolize nutrients differently. Mitochondria play a central role in this altered metabolism. Mitochondria coordinate the catabolism of glucose and glutamine across the cancer cell. Disrupting this metabolism may potentially treat the disease. This special issue focuses on small molecules that inhibit the cancer cell mitochondrial metabolism, which are in pre-clinical or clinical development.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.
