

## Special Issue

# Identification and Characterization of Antimicrobial Peptides with Therapeutic Potential

### Message from the Guest Editor

*Pharmaceuticals* has initiated a collection on antimicrobial peptides (AMPs). The main theme is “*Identification and Characterization of Antimicrobial Peptides with Therapeutic Potential*”. During 2013–2014, the journal published several articles that discuss AMPs from amphibians, birds, insects, fish, reptiles, humans, fungi (under review), and plants (ongoing). We thank authors for their contributions. The journal would like to continue this interesting topic and you are encouraged to submit review articles, original articles, and communications on AMPs. Review articles that summarize AMPs from other life domains (bacteria, protozoa, mollusca, worms, spiders, and so on) are especially welcome. In addition, original articles that report novel AMPs (natural or engineered) are also invited.

### Guest Editor

Prof. Dr. Guangshun Wang

Department of Pathology & Microbiology, University of Nebraska Medical Center, Omaha, NE 68198, USA

### Deadline for manuscript submissions

closed (30 December 2013)

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.
