# New Tools for Medicinal Chemists

### Message from the Guest Editors

Past decades have seen the birth of innovative technologies and strategies enabling the medicinal chemist to explore new therapeutic opportunities and better contribute to improvements in health and wellbeing. Exceptional progress has been made in microwave- and ultrasound-assisted syntheses, mechanochemistry, multi-component reactions, combinatorial chemistry, high-throughput screenings, computational studies, analytical methods, spectroscopy and imaging, and many other topics of critical importance in modern pharmaceutical sciences. This Special Issue is aimed at giving our readers a vast overview of these innovations and how they can be exploited to advance scientific knowledge and understanding in drug discovery and development.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.
