submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

Porous silica materials and composites on their bases attract increasing interest as carriers in drug delivery systems due to their unique properties, such as high specific surface area, controllable porosity, easy-to-modify surface, low cytotoxicity, etc. These properties allow the loading of significant amounts of drugs and can solve problems related to low solubility by modifying drug release, resulting in bioavailability enhancement and greater treatment effectiveness.

This Special Issue is focused on the design and development of novel drug delivery systems on the basis of porous silica or porous silica-containing materials, as well as the characterisation of their physico-chemical and biopharmaceutical properties. Studies on the synthesis of new porous silica materials as carriers in delivery systems, investigations of carrier–drug molecule interactions, and evaluations of the drug release rate and biocompatibility of the obtained systems are welcome to contribute to this SI.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
