College of Pharmacy and
Nutrition, University of
Saskatchewan, 107 Wiggins
Road, Health Sciences Building,
Room 3D01.5, Box 3D01-13,
Saskatoon, SK S7N 5E5, Canada

Deadline for manuscript
submissions:

closed (31 October 2024)

Message from the Guest Editors

In the last few decades, nucleic acid-based therapy has achieved rapid development leading to the approval of some gene therapeutics. However, the instability, short half-life, and membrane impermeability severely hinder the efficient delivery of gene drugs. Development of safe and efficient delivery systems remains the key issue to advance gene therapy. Viral vectors and non-viral vectors, the two main delivery systems at present, have their own advantages and disadvantages. Nanomaterial-based non-viral vectors, including polymers, dendrimers, liposomes, lipid nanoparticles, peptides, and inorganic nanoparticles, have the advantages of safety, non-immunogenicity, and ease of massive production and have been extensively explored for gene therapy. To promote their clinical translation, researchers have tried various strategies to improve delivery efficiency and reduce off-target effects. This issue focuses on the latest progress of nucleic acid delivery systems and highlights the challenges for their translation into clinic, aiming to present a fundamental understanding of this field.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
