Message from the Guest Editors

Dear Colleagues,

In the dynamic landscape of dermatological therapeutics, the field of drug delivery plays a pivotal role in the design of new treatment approaches and improving patient outcomes. This Special Issue seeks to explore recent advancements in cutaneous, follicular, and unguis drug delivery for dermatological applications and provide a platform for scientists, clinicians, and industry experts to share insights and achievements in the field that enhance drug permeation, prolong drug release, and improve patient safety and compliance in dermatological treatments.

Contributions are invited across a spectrum of themes, including, but not limited to, novel formulations, permeation enhancement strategies, and targeted delivery for various dermatological conditions. Special consideration will be given to original research, including clinical trials of all phases as well as preclinical and translational studies. Reviews and meta-analyses exploring the efficacy and safety of drug delivery systems are also encouraged.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
