Message from the Guest Editor

Dear Colleagues,

Crystallization is an important separation process that generates crystalline materials with high purity and yield. In the area of pharmaceutical research, crystallization of active pharmaceutical ingredients (APIs) has been vigorously studied because of its great influence on the physicochemical properties of APIs. Size, shape, and phase of the crystals are some of the features frequently controlled during crystallization and they are closely related to the solubility, dissolution rate, and stability of the resulting API solid forms.

The aim of this Special Issue is to provide a forum for researchers in the broad field of pharmaceutical crystallization. While the focus is specifically on the crystallization of APIs, this Special Issue is open to original research and review articles on all aspects of pharmaceutical crystallization.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
