Message from the Guest Editors

Dear Colleagues,

Recently, techniques for analyzing endogenous and exogenous substances present in biological samples have been developed due to the development of analytical instruments that combine chromatography and mass spectrometry. As a result, as micro-analysis of drugs is possible, microdosing methods for studying the pharmacokinetics of drugs in humans through the administration of sub-therapeutic doses have been developed and applied in clinical trials. In addition, metabolomics techniques that target endogenous substances in biological samples have been developed, and various studies on biomarkers that can be used to diagnose the disease early and evaluate the efficacy of drugs have been actively conducted. This Special Issue aims to highlight current progress in bioanalysis related to drug metabolism and pharmacokinetics and drug- and disease-related metabolomics.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
