Message from the Guest Editor

Dear Colleagues,

Most prevalent dental infections include dental caries, periodontal and endodontic infections and implant-related infections. Dental infections are mainly of polymicrobial origin and are caused by various combinations of viruses, bacteria and fungi. Many of these infections occur as biofilms that acts as a barrier to antimicrobial agents, presenting a treatment challenge.

The oral cavity and dental tissues present a unique and challenging environment that may impair the penetration and effect of the antimicrobial substances, thus limiting their therapeutic potential.

We invite authors to submit original research and review articles on contemporary conventional and nanotechnology-based antimicrobial strategies that will help us to reach a better understanding of the management of dental infections.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
