Deadline for manuscript submissions:
closed (31 May 2017)

Message from the Guest Editor

Dear Colleagues,

Stability is a term widely used to designate the chemical and physical integrity of both the drug and the dosage form. This field of research has expanded over recent years to include the effects on stability of storage and transport, repackaging and in-use stability and importantly the potential clinical outcomes for patients who may be exposed to toxic effects of drug degradants. The aim of compiling this Special Issue of *Pharmaceutics* on the topic of "Drug Stability" is to draw together experts with knowledge in the field across this widely diverse area including chemists, pharmaceutical scientists, analytical chemists and clinicians, who are engaged in contemporary pure and applied research to solve the challenges of delivering stable and quality drug dosage forms to all populations. Submissions (original papers and reviews) that contribute to understanding and applications of relevance for Drug Stability are welcomed for this Special Issue.

Prof. Dr. Beverley D. Glass

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
