### Message from the Guest Editors

Several promising techniques have been developed to overcome the poor solubility and/or membrane permeability properties of new drug candidates, including different fiber formation methods. Electrospinning is one of the most commonly used spinning techniques for fiber formation applied to the drug-loaded solution. The fiber properties enable the improved rate and extent of solubility, causing a rapid onset of absorption. However, the enhanced molecular mobility of the amorphous drugs embedded into the fibers is responsible for their physical-chemical instability.

This Special Issue will address new developments in the area of electrospun nanofibers for drug delivery applications. We invite articles on all aspects of drug-loaded fibrous dosage forms focusing on the processability, structures and functions, and stability issues based on regulatory requirements.

Deadline for manuscript  
submissions:

**closed (31 August 2019)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed by the [Science Citation Index Expanded](#) (Web of Science), BIOSIS Previews and [Scopus](#). Citations available in [PubMed](#), full-text archived in [PubMed Central](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 13.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2020).
