Message from the Guest Editors

Dear Colleagues,

It is challenging to deliver macromolecules (e.g., proteins, peptides, antibodies, and oligonucleotides) orally due to the delivery barriers and microenvironmental challenges encountered along the gastrointestinal tract. In the last few years, novel medical devices have been developed which are capable of overcoming these barriers and delivering a wide range of molecules in different organs, all the way from the mouth to the colon. Microneedle-based pills, nanostraws, microjets, hydrogels and intestinal patches are some of the device-based solutions that researchers have designed to enable the oral dosing of macromolecules. These alternative delivery methods have the potential to revolutionize many treatments by increasing patient adherence and efficacy while reducing pain and other side effects.

This Special Issue aims to capture the most recent advances to overcome the oral drug delivery barriers of the gastrointestinal tract. We invite reviews and research articles from clinical, academic, and industry settings on "Novel Devices for the Oral Delivery of Macromolecules."

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics, Ernest Mario School of Pharmacy, Rutgers University, Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
