Message from the Guest Editors

Dear Colleagues,

Over the past few decades, transdermal drug delivery through microneedles has become an attractive approach for therapeutics compared with parenteral and oral routes. Microneedles are capable of overcoming the barrier properties of stratum corneum in a minimally invasive manner, increasing the delivery efficiency and effectiveness of encapsulated compounds across the skin. The number of publications related to microneedles has been rapidly increasing. Moreover, to overcome the limitations of previously developed technologies, a series of novel microneedle fabrication methods, applicators, and novel geometries were introduced. Therefore, in this Special Issue, we aim to further explore the potential of microneedles in the pharmaceutical field by showcasing the most recent advances in microneedle-based drug delivery systems.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
