Novel Strategies for Cancer Targeted Delivery

Guest Editors:

Dr. Magdalena Markowicz-Piasecka

Department of Pharmaceutical Chemistry, Drug Analysis and radiopharmacy, Medical University of Lodz, 90-151 Lodz, Poland

Dr. Kristiina Huttunen

School of Pharmacy, Faculty of Health Sciences, University of Eastern Finland, P.O.Box 1627, FI-70211 Kuopio, Finland

Deadline for manuscript submissions:

closed (31 August 2022)

Message from the Guest Editors

Dear Colleagues,

Among the controlled drug delivery technologies, targeted drug delivery has attracted the attention of researchers, as it comprises the systemic delivery of a drug carrier system to specific cell types, tissues, or organs. Targeted drug delivery systems would mainly be beneficial in diseases such as cancers, which are a leading cause of death worldwide. Advancements in omic sciences, analytical procedures, and high-throughput screening in the last two decades have led to the realization that cancer is more complex than was originally conceived. Numerous challenges impede effective cancer treatment and development of effective drugs such as ineffective therapeutic drug concentrations reaching the tumor site, life-threatening side effects caused by nonspecific tissue distribution of anti-neoplastic agents, and acquired resistance of cancer cells upon chemotherapy that triggers cross-resistance to a wide range of different drugs. The complexity of cancers requires the development of very delicate approaches in the course of the drug discovery pipeline.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
