### Message from the Guest Editors

Dear Colleagues,

It is established that the medication acceptability of dosage forms could influence patient compliance and treatment efficacy and safety. Currently, research focuses on developing patient-centric formulations as personalized dosage forms where the product provides the benefits for individual patient needs. According to the World Health Organization (WHO), patient-centric formulations are becoming essential for public health when dealing with long-term diseases treated with multiple drugs. However, data related to the understanding of dosage form-related issues in medication acceptability are lacking. Therefore, the development of advanced technologies has resulted in significant efforts to develop customizable dosage forms.

The focus of this Special Issue of *Pharmaceutics* will be on assessing and identifying dosage form-related issues in medication acceptability and recent advances in the development of effective strategies to produce patient-centric dosage forms to improve acceptability. This Special Issue will accept both Reviews and Research articles.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
