submissions:

closed (28 February 2022)

Message from the Guest Editors

In pharmaceutical research, pharmacokinetic properties have been recognized as one of the major factors for the decline in the success of new drugs. In the last 30 years, the development of new bioassay techniques, biotechnology methods, bioguided phytochemical studies, automated high throughput screening, and high-performance analytical methods has introduced new concepts and possibilities in drug discovery.

This issue will include studies on drug absorption evaluations; metabolism or biotransformation of toxicants; oxidation, reduction, and hydrolysis mechanism studies; theoretic prediction approaches; and metabolic pathway elucidations. Scientific studies that seek to interpret and improve the ADMET properties of drug candidates are welcome.

Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
