submissions:

closed (30 June 2023)

Message from the Guest Editors

Several polysaccharides, including chitosan and alginate, have been used for a diverse range of biomedical applications due to their advantageous characteristics, such as biocompatibility, biodegradability and low immunogenicity. Such uses include tissue-engineering scaffolds, pharmaceutical preparations, drug delivery, imaging and prosthetics. Furthermore, chemical modification of materials has led to new synthetic materials capable of enhancing the physical and chemical performance of their predecessors, for example, drug loading and uptake, as well as drug targeting and improved mechanical properties.

For this Special Issue, we are inviting submissions exploring novel trends and evaluations of the use of modified and non-modified polysaccharides in biomedical applications. Contributions may focus on single polymers or copolymers and integration of active pharmaceutical ingredients into hydrogels or polysaccharide nanocarriers. Potential topics of interest include, but are not limited to, the anti-microbial activity, wound management capabilities and anti-cancer activity of these hydrogels/nanocarriers. Original research manuscripts and literature reviews are both welcome.

an Open Access Journal by MDPI

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
