Deadline for manuscript submissions:
closed (10 June 2019)

Message from the Guest Editors

There has been growing interest in delivering drugs via the vaginal route for local and systemic delivery. The large surface area, high vasculature, access to the lymphatic system and potential for drug delivery throughout the female reproductive tract makes the vagina a desirable route of administration. As a result, this route has been exploited for delivering a wide variety of drugs including antimicrobials, antifungals, contraceptives, anticancer drugs, and labor-inducing drugs. In addition to small molecule drugs, labile drugs such as antibodies, proteins, genes, and probiotics have also been delivered via the vaginal route.

This Special Issue welcomes any topics regarding aspects that impact vaginal drug delivery research including research toward a better understanding of the biological components that impact drug disposition within the female lower reproductive tract, novel vaginal drug delivery systems, new vaginal products, animal or imaging methods to evaluate vaginal products, in vitro experimental methods to facilitate vaginal product development, compartment-specific modeling, in vitro-in vivo relationships, behavioral research, and preclinical assessments.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
