# Smart Responsive Nanocomposite as Advanced Drug Delivery System in Regenerative Tissue Engineering

### Message from the Guest Editors

This Special Issue, entitled “Smart Responsive Nanocomposite as Advanced Drug Delivery System in Regenerative Tissue Engineering”, aims to explore the latest advancements in the development and application of nanocomposite materials that respond to external or internal stimuli for targeted, controlled, and sustained drug delivery in tissue regeneration. We aim to highlight innovative research on the design, fabrication, and functionalization of smart nanocomposites, as well as their integration with regenerative therapies for bone, cartilage, neural, and cardiac tissues. This Special Issue also aims to address challenges in biocompatibility, safety, and scalability, and explore the potential for clinical translation.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
