Advances in Bioactive Peptides from Natural Sources: Characterization, Biological Targets and Promising Applications

Message from the Guest Editors

Studies on the pathophysiological mechanisms of envenoming and molecular characterization of toxins from the *Bothrops jararaca* snake venom resulted in the relevant discovery of bradykinin and bradykinin-potentiating peptides (BPPs), recognized by the first natural inhibitors of angiotensin I-converting enzyme (ACE) and model for the development of captopril, the first ACE inhibitor and the first commercially available drug for the treatment of arterial hypertension. In this sense, several peptides obtained from the venoms of amphibians, snakes, scorpions, and spiders have been reported in the literature as important bioactive compounds with important pharmacological effects and potential therapeutic applications. The aim of this Special Issue is to report current advances in bioactive peptides from natural sources, focusing on their characterization, biological targets, and promising applications. We are pleased to invite you to submit original research articles and reviews. Research areas may include (but are not limited to) the discovery and characterization of novel bioactive peptides, including pharmacological studies and development of bioproducts.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
