## Polymers Enhancing Bioavailability in Drug Delivery, 2nd Edition

### Message from the Guest Editor

Currently, many of the drug entities entering the clinic face bioavailability issues, mainly due to poor water solubility and/or permeability, in addition to issues with physicochemical instability or degradation in the body. Polymers, either natural or synthetic, present an array of different backbones and functional groups, sizes, shapes, as well as mechanical and degradation properties, which have been exploited in drug delivery and targeting. Strategies for bioavailability enhancement using functionalized polymers include solid amorphous dispersions for improved solubility; chemical modification for extended blood residence and reduced or abrogated immunogenicity and antigenicity; protection from harsh pH or enzymatic degradation; as well as tailored rate and temporal/spatial drug release. This Special Issue, Polymers Enhancing Bioavailability in Drug Delivery—Volume II, aims to review the specific functional benefits granted by polymers to formulations, which are very much reliant on polymer structure and design, and result in improved drug bioavailability and therapeutic index. You are welcome to submit your research or review

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
