Multicomponent Nanomedicines for Photodynamic Diagnosis and Photodynamic Therapy

Message from the Guest Editors

Even though different drug discovery studies are composed of a single chemical entity, most analysts believe that “the one drug to fit all” approach will be unsustainable in the future as many diseases are multifactorial in nature and individual molecular targets cannot usually combat multifactorial diseases wherein multiple tissues or cell types are affected. Therefore, multi-drug or multi-target therapies are considered to be advantageous for multifactorial diseases. Our focus of this Special Issue is on multicomponent targeting drug delivery for photodynamic diagnosis (PDD) and photodynamic therapy (PDT) of oncological diseases. In addition, nanotechnology integrated with PDD and PDT strategies is a promising approach for the diagnosis and treatment of accurate lesions. In this regard, this Special Issue aims to publish high-quality research papers and reviews focusing on the design of smart nanomedicines in the PDD and PDT of various oncological tumors.

Guest Editors

Prof. Dr. Heidi Abrahamse

Laser Research Centre, Faculty of Health Sciences, University of Johannesburg, P.O. Box 17011, Johannesburg 2028, South Africa

Dr. Hanieh Montaseri

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
