

Special Issue

Biopolymer Materials for Wound Healing, 2nd Edition

Message from the Guest Editors

Biopolymers have interesting physical and chemical properties, structures, and biological activity required to promote wound healing. In addition, they can be processed into a variety of shapes (i.e., films, fibers, gels, and particles). They are often associated with cells and/or therapeutic biomolecules to further improve wound healing. Moreover, the modification of biopolymers with different functional groups has led to the development of stimuli-responsive materials, in which it is possible to trigger the release of therapeutic molecules in biological environments with different characteristics. This Special Issue highlights some of the most promising approaches to biopolymer materials for wound healing applications. We invite articles on all aspects of research in this field, which may help to accelerate scientific knowledge and reach clinical applications.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
