Nanoparticles for Dermal and Transdermal Delivery

Message from the Guest Editor

This Special Issue, entitled “Nanoparticles for Dermal and Transdermal Delivery”, highlights the recent advancements and cutting-edge research in the field of nanoparticle-based delivery systems tailored for dermal and transdermal applications. With the growing interest in overcoming the formidable barrier properties of the stratum corneum, this Special Issue collates original research articles, comprehensive reviews, and case studies focusing on the design, characterization, and evaluation of nanoparticles that facilitate effective drug delivery into/through the skin.
