Special Issue

Paediatric Dosage Forms: New Approaches to Old Challenges

Message from the Guest Editors

The paediatric population ranges from neonates to adolescents, with distinct differences in size, body composition, bodily function and sensory maturity across this age range. Many medicines for adults have potential applications for children but lack the dosing flexibility and demonstration of safety and efficacy through clinical trials to support use across the paediatric spectrum. Young children, especially neonates, handle drugs and excipients differently to older children and adults. With this in mind, a range of methods have been investigated to develop suitable patient-centric paediatric formulations. The aim of this Special Issue of *Pharmaceutics* is to highlight new methodology related to paediatric product research and development. We invite researchers to publish their original research or review articles regarding the reformulation of off-patent drugs, novel excipients. administration devices and sensory pharmaceutics, with a focus on paediatrics.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
