

Special Issue

Nanocomposites as Implantable Devices or Drug Delivery Platforms: A New Insight into Treat Dental and Oral Diseases

Message from the Guest Editors

Nanocomposites are multiphase materials where at least one component is in the nano-scale range. Due to their unique properties, they are currently spotlighted as versatile and innovative dosage forms. Their multifunctional components could determine targeted drug delivery and co-administration of incompatible actives, offering innovative treatment options for periodontitis, oral lichen planus (OLP), medication-related osteonecrosis of the jaw (MRONJ), and oral cancers. Nanocomposites can mitigate any systemic side effect by ensuring localized and controlled release of synthetic drugs and natural compounds with pronounced anti-inflammatory, antioxidant, anticancer, wound healing, antibiotic, and osteoinductive activities while improving treatment effectiveness and success.

This Special Issue will cover all the advances, challenges, and future perspectives in using active-loaded nanocomposites to manage dental and oral diseases. Literature reviews and research papers concerning developing nanocomposite-based innovative drug delivery systems (e.g., bone substitutes, covering materials, gingival patches of films, periodontal injectable in situ gelling matrices, etc.) are welcome.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
