

## Special Issue

# Natural Macromolecule-Based Nanocarriers for Drug Delivery

### Message from the Guest Editor

Natural macromolecules, including polysaccharides, proteins, nucleic acids, and lipids, are natural sources of biopolymeric materials which are not only biocompatible and biofunctional but they also have easily modified active groups in their structure that are highly effective in establishing fabricating nanocarriers for drug delivery. Natural macromolecules enable the construction of a wide variety of multifunctional drug delivery systems. They can be directly linked with drugs to form drug-polymer systems, prepared into nanoparticle encapsulated drugs and modified on the surface of various nanoparticles. This Special Issue aims to provide a scientific platform for scientists to highlight recent advances in natural macromolecules-based drug delivery. In this Special Issue of *Pharmaceutics*, we invite authors to submit original research articles or reviews. Research areas may include, but are not limited to, the following topics: nanocarrier synthesis, mechanism research, theoretical developments, controlled release, targeted delivery, and molecule role in delivery. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
