# Recent Advances in the Application of Biomaterials in Drug Delivery and Regenerative Medicines

## Message from the Guest Editors

Biomaterial advances have allowed significant progress in biology and medicine, with biomaterials becoming increasingly important for drug delivery, tissue engineering, and new clinical treatments. However, that materials be designed that support and guide cells during healing and remodeling processes in regenerative medicine. A number of advanced tissue engineering systems work in conjunction with bioactive agents to enhance tissue regeneration by modulating the cellular environment. Bioactive agents include, for example, small molecules, bioactive ions, genes, cells, and growth factors applied either singly or simultaneously to a target. In many cases, bioactive agents must act intracellularly at the molecular level due to their sensitivity to the surrounding environment. It is therefore required to provide a suitable carrier, such as hydrogels, bioceramics, electrospun fibers, nano/microparticles, or genetically modified cells, in order for these agents to be effective. It is also important to emphasize that such local or site-specific smart drug delivery systems are highly successful because they combine active agents, cells, biomaterials, and nanotechnologies efficiently.

## **About the Journal**

## Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
