Novel Biomaterials for Bone Regeneration

Message from the Guest Editors

Recent developments in biomaterials for bone regeneration have emphasized the integration of drug delivery systems to enhance healing and tissue integration. Bioceramics, such as hydroxyapatite and tricalcium phosphate, are not only biocompatible and osteoconductive but also serve as effective carriers for controlled drug release, promoting bone cell adhesion and proliferation. We invite researchers to contribute original research articles, reviews, and clinical studies that explore the intersection of biomaterials, drug delivery, and bone regeneration. Topics include, but are not limited to, the following: Bone tissue regeneration; Drug delivery systems for bone repair; Nanomedicine in bone regeneration; Pharmacokinetics and pharmacodynamics of bone-targeted therapies; Dental biomaterials and implant dentistry; Growth factors and bioactive molecules in bone healing; 3D-printed scaffolds with drug-eluting properties; Formulation strategies for osteogenic drugs. By contributing to this Special Issue, you will help advance the rapidly evolving field of bone regeneration materials and their applications in pharmaceutics. We look forward to your submissions.

Guest Editors

Dr. Matej Tomas

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
