Special Issue

Novel Biopolymer for Targeted Drug Therapy

Message from the Guest Editors

Smart drug delivery biosystems with performed therapeutic efficacy within optimal patient compliance and cost effectiveness have been explored. Biodegradable polymers have been widely employed in the clinical delivery industry because they can be biologically broken down inside the human body, releasing non-toxic components. Tailored biocompatible drug delivery benefits from a comprehensive understanding of biopolymers features, which involve extraction manufacturing techniques, chemistry, and studies of surface properties, rheology, and biodegradability. This Special Issue will focus on "Novel Biopolymer for Targeted Drug Therapy". Original research papers and comprehensive reviews are welcomed.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics, Ernest Mario School of Pharmacy, Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
