Polymeric Nanoparticles for Cancer Treatment

Message from the Guest Editors

Currently, the use of nanotechnology as a promising tool in cancer treatment is becoming a reality. Polymers have emerged as one of the most important and versatile raw materials to obtain novel nanovehicles to treat different types of cancer. The easy modification of different functional groups and polymeric chains can provide many types of polymers with a wide range of solubilities, including stimulus-responsive polymers that can allow selective drug release in different microenvironments and also the incorporation of various biomolecules to obtain smart nanovehicles, improving the selectivity and efficiency of nanosystems. The search for new polymers that can be approved by different regulatory agencies for use as a raw material to obtain new nanoparticles for cancer treatment is currently an important topic in nanomedicine. In addition, establishing new methods for polymeric nanoparticle formulation, the encapsulation of new drugs and the modification of nanoparticles with different biomolecules to achieve more selective cancer treatment is a necessity.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
