# The Latest Technology for the Prediction and Improvement of Drug Absorption

### Message from the Guest Editors

In the past decade, drugs have been developed to accommodate a wide range of small- (about 500 Da), medium-, and large-molecule candidates. Oral administration is the most convenient way for patients to take medications, and leads to high adherence. To determine the feasibility of developing a candidate as an oral drug, appropriate methods are required for predicting intestinal absorption. First, we focus on methods that use human intestinal tissue. Next, we introduce new findings on co-cultured models that use Caco-2 cells, and on in silico systems. These alternative in vitro methods are not only convenient for predicting intestinal drug absorption, but can also be used in a variety of research locations without strict controls, such as ethical and biosafety assessments. On the other hand, it is necessary to develop an oral absorption improvement technique that enables the intestinal absorption of medium- and large-molecule drugs; such technology should facilitate the development of these drugs. Therefore, we also introduce recent advances in nanocrystal systems.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
