Special Issue

Biofunctional Pharmaceutical Additives for Targeted, Improved Bioavailability and Safety of Medicine

Message from the Guest Editors

Biofunctional excipients have recently emerged, such as smart polymers, lipids, and other safe and natural additives that can alter drug solubility, release characteristics, permeability, and pharmacokinetic profiles. Typical example include in situ forming polymers, amino acids, cyclodextrins, and many more. The new knowledge obtained from novel research ideas and manuscripts will contribute to improving bioavailability, reducing adverse effects, achieving drug targeting, or promoting better patient treatment adherence. The focus of this Special Issue is on recent developments in biofunctional non-active ingredients/excipients used to design pharmaceutical formulations and delivery systems (for topical or systemic routes) that could confer targeted drug delivery or modified drug release to enhance efficacy, reduce irritation at the absorption site, and beyond. We would be much appreciating if you would consider being one of our authors contributing to this Special Issue. All types of submissions are welcome, including original research articles and comprehensive reviews.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
