

Special Issue

Inhaled Medicines: Past, Present and Future

Message from the Guest Editor

This Special Issue invites cutting-edge original research, comprehensive reviews, and translational perspectives on inhaled drug delivery across past achievements, current innovations, and future directions. We welcome contributions on device development, formulation strategies, regulatory considerations, PK/PD modeling, and clinical applications in both common and rare diseases. Of particular interest are studies exploring the use of inhaled therapies for systemic diseases, innovations in drug–device combinations, and AI-enabled inhalation platforms. We encourage researchers, clinicians, and industry scientists to submit their work and help shape the future of inhalation science. Together, let us explore how inhaled medicines can redefine therapeutic paradigms.
