Special Issue

Nano-Based Technology for Glioblastoma

Message from the Guest Editors

Nano-based technology offers promising avenues for treating glioblastoma, the most common and deadliest form of primary brain cancer in adults. Innovative approaches utilizing nanoparticles to deliver therapeutic agents directly to tumor cells have been successfully designed to enhance drug efficacy while minimizing off-target effects. Nanoparticles can not only penetrate the blood–brain barrier, allowing for targeted drug delivery to tumor cells, but can also be engineered to release drugs in response to specific stimuli within the tumor microenvironment. This Special Issue aims to include original research articles and reviews within, but not limited to, the following research areas: design and development of nanoparticles that specifically target glioblastoma cells; strategies to enhance the ability of nanoparticles to penetrate the blood–brain barrier; engineering stimuli-responsive nanoparticles or immunomodulatory nanoparticles; nano-delivery platforms for combination therapies; imaging, diagnosis, and theranostics with nano-based systems, among others. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy, Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
