Advances in Pharmacogenomic Studies

Message from the Guest Editor

Pharmacogenomics (PGx) is a field of pharmacology that addresses how genetic factors contribute to the body's response to given medications. This informs prescribing decisions and facilitates the tailoring of patient-specific drug regimens, thus improving clinical responses. Today, PGx is a well-established discipline in several developed countries with some clinical applications, but it is considered emergent in developing countries, and has almost no applications in undeveloped countries. This illustrates unequal development in this important field, which is an issue in many countries where this discipline could prove cost-effective or even cost-saving. This Special Issue addresses the current state of pharmacogenomics, precision medicine approaches to improving drug therapies, and challenges that must be overcome to enable their clinical application. Updated research on PGx and its clinical applications is required. To this end, this Special Issue encourages researchers to submit up-to-date original research, meta-analyses, systematic reviews, case reports, clinical trials, and specific reviews on this topic.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
