Special Issue

Exploring the Versatility of Cyclodextrins in Pharmaceutical Formulations

Message from the Guest Editor

The application of cyclodextrins (CDs) as pharmaceutical excipients is highly appreciated and well established. Several papers focusing on various beneficial properties of CDs in this field have been published. CDs are commonly applied as drug delivery systems, solubilizers and absorption promoters, agents that improve drug stability, and excipients used for the heat and radiation protection of other molecules and even active pharmaceutical ingredients (APIs), However, the applications of CDs have several drawbacks. For example, CDs are usually capable of binding only one drug molecule (fully or partially), showing poor drug loading capacity. Additionally, the relatively low stability constants of drug-CD complexes contribute to easy dissociation and release of their contents. However, due to highly reactive hydroxyl groups, CDs can act as polyfunctional monomers. The polymerization of CDs leads to the formation of cyclodextrin-based nanosponges (CDNSs) and other macromolecules.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
