Advanced Polymeric Materials as Therapeutic Agents

Message from the Guest Editors

We are delighted to invite you to participate in a new Special Issue entitled "Advanced Polymeric Materials as Therapeutic Agents." This Special Issue aims to showcase the latest breakthroughs in the realm of polymer-based therapeutic applications, an area that has witnessed remarkable growth and innovation in recent years.

Polymeric materials, whether derived from natural sources or synthetically engineered, have become indispensable in various medical domains, including imaging, diagnosis, and drug delivery. Their versatility enables the development of tailored solutions that enhance therapeutic efficacy while minimizing adverse systemic effects. As such, the exploration of polymer-based therapies presents unprecedented opportunities regarding the advancement of medical science. This Special Issue seeks to delve into subjects that align closely with the journal's overarching themes. We welcome the submission of original research articles and reviews that delve into the multifaceted landscape of polymer-based therapeutics.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.
