Special Issue

Pharmacy Compounding of Personalized Preparation for Specific Patients: Challenges and Advantages, 2nd Edition

Message from the Guest Editors

Preparation of personalized medicines in a hospital or community pharmacy allows variation of the quantity of each active ingredient within a preparation, as well as usage of combined substances which can be more efficient if mixed. The ability to personalize dosages is particularly useful when treating age groups with different needs -, e.g., children and the elderly. It is also useful when treating patients suffering from neoplasia or degenerative diseases that can cause a range of conditions and pain. The possibility to dispose of compounded drugs is also fundamental in the veterinary field where there are often no registered products on the market for a determined affection in an animal species. This Special Issue of *Pharmaceutics* focuses on articles and reviews relating to formulations intended to meet the needs of specific patient populations—both human and veterinary. Particular attention will be paid to studies related to selecting the most suitable components, evaluating their compatibility and stability, developing standard operating procedures.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
