Special Issue

Cyclodextrins in Drug Delivery, 2nd Edition

Message from the Guest Editors

Cyclodextrins are one of the most versatile tools in pharmaceutical technology due to their unique structural conformation. They are cyclic oligosaccharides consisting of (\(\mathbb{Q}\)-1,4-)-linked \(\mathbb{Q}\)-D-glucopyranose units with a hydrophilic outer surface and a hydrophobic central cavity, able to form non-covalent inclusion complexes with a wide range of molecules, including a variety of drugs.

Cyclodextrins play a very important role in formulation by improving drug solubility and/or dissolution, permeability, and physical and chemical stability, thus enhancing their bioavailability. Other applications include odor and taste masking, prevention of incompatibility, and control of drug release.

Moreover, their combined use with various nanocarriers can be an interesting approach to simultaneously increase the performance of both as drug carriers. Due to their multifunctional properties, cyclodextrins can be exploited in the development of almost every kind of drug delivery system. Authors are kindly invited to submit original papers and reviews regarding potential applications of cyclodextrins in drug delivery, to be published in this Special Issue of Pharmaceutics.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
