## Non-invasive Biopharmaceutical/Vaccine Delivery Systems and Formulation Strategies

### Message from the Guest Editors

This Special Issue focuses on developing a universally applicable, efficient, and non-invasive biopharmaceutical/vaccine delivery system and formulations. The extensive potential of highly effective, long-term, thermally stable, liquid or solid-type drugs arises from their dose-sparing effect, the ability to stockpile, the lack of any need for cold-chain storage/transportation, and self-administration. This Special Issue should be of immediate interest to a diverse readership, including those interested in non-invasive drug/vaccine technology for a wide range of biopharmaceuticals (i.e., genes, peptides, proteins, virus, cells, etc.). For the purpose of this Special Issue, the submission of any original research articles and reviews on non-invasive biopharmaceuticals/vaccines (oral, transdermal, and intranasal) will be highly appreciated. Research areas may include (but not limited to) the following: drug/vaccine manufacturing, stability, formulation, administration routes, delivery system, and dose-sparing technology. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
