Cocrystal Engineering in Pharmaceutical Formulations

Message from the Guest Editors

The *Pharmaceutics* journal is pleased to announce this Special Issue, titled "Cocrystal Engineering in Pharmaceutical Formulations". This Special Issue will focus on the design, synthesis, characterization, and application of pharmaceutical cocrystals. We welcome contributions on efficient cocrystal screening, drug–drug cocrystal design, mechanistic studies on structure–property relationships, and computational or data-driven approaches for cocrystal structure prediction. Research on scale-up strategies, regulatory and intellectual property aspects, as well as case studies bridging laboratory innovation to clinical and commercial translation, are of particular interest. We invite researchers and pharmaceutical scientists to contribute original research and comprehensive reviews exploring the design, development, and application of cocrystals in pharmaceutical formulations for improved drug performance and therapeutic outcomes.
