# Contribution of Dendrimers and Other Dendritic Polymers in Medical Nanotechnology

## Message from the Guest Editors

The concept of mimicking nature's dendritic patterns through radial polymerization has afforded such a diversity of derivatives that their recognition as a fourth class of polymers is imperative. Research on dendritic polymers is characterized by its interdisciplinary nature, with both current and prospected applications involving most of the natural and medical sciences. The latter benefit from these polymers' exceptional properties. unique architecture and similarity to biomolecules. The intramolecular cavities and intermolecular associations range from ions and small molecules to large biological entities. External groups are susceptible to functionalization and, in parallel, provide high local concentrations of active groups. In harmony with the trend of nanotechnology-empowered implementations, solutions to major health challenges have been discovered. This Special Issue is dedicated to all the efforts of contemporary scientists working in the field to address sanitary needs and aims to present the broad spectrum of future prospects of this research.

## **About the Journal**

## Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
