Biomaterials for Skin Drug Delivery

Message from the Guest Editor

The skin is a highly accessible and protective organ, making it an attractive route for drug administration. However, its barrier function, particularly the outermost layer, the stratum corneum, poses significant challenges for effective transdermal and dermal drug delivery. In recent years, biomaterials have emerged as key enablers in overcoming these limitations, from hydrogels and nanocarriers to microneedles and bioresponsive systems. Advances in biomaterials are transforming the skin drug delivery field.

This Special Issue highlights recent progress in the design, development, and application of biomaterials for skin drug delivery. We welcome original research papers and reviews. Research areas may include, but are not limited to, the following: polymeric and lipid-based carriers, hydrogels, microneedles, nanomaterials, bioresponsive or stimuli-responsive systems, and biofabrication techniques. We also invite studies focusing on drug release kinetics, skin permeation enhancement, and safety evaluation, as well as applications in dermatological therapy, wound healing, inflammation, and infections.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
