# Phenolic Compounds Loaded by Drug Delivery Systems Applied to Mitigate Inflammatory States

### Message from the Guest Editors

Immune-mediated inflammatory diseases (IMIDs) affect 3 to 7% of the developed world's population and include approximately 80 conditions whose prevalence is increasing. Authors are invited to submit original research articles and reviews in this prevailing and curious research field in an effort to envision future precise applications for bioactive compounds in the fight against IMIDs, new drug delivery strategies for natural products load, and new findings in phenolic profile of unknown or less known natural sources of bioactive compounds. The mechanisms of action at the cellular, molecular, and genetic levels, pharmacokinetics, and toxicokinetics are of biggest interest.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
