

## Special Issue

# Skin Care Products for Healthy and Diseased Skin

### Message from the Guest Editor

The skin represents the largest organ in humans, and it covers the whole body. It is the body's first line of defense against undesired influences from the environment caused by exogenous substances. Thus, maintaining skin health is of crucial importance and necessitates a multifaceted approach. With this Special Issue, we aim to highlight current progress in the use of conventional skin care products, as well as to represent novel approaches based on multifunctional modern skin care products.
