Peptide-Drug Conjugates for Targeted Anti-Cancer Therapy: From Design to Application

Message from the Guest Editor

Peptide-based biomolecules are generally well recognized or degraded by the target protein, making it easy to modify or design the targeting function. Combined with prodrugs, antibody–drug conjugates (ADCs) or nanomedicine, various peptide-based therapeutics are being studied for clinical applications. Newly developed peptide–drug conjugates could represent a promising therapeutic treatment for patients. Topics of interest to this Special Issue include various peptide–drug conjugates for targeted therapy, new drug delivery systems, prodrug design, anti-cancer therapy and related concepts. Original research and review papers are welcome. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
