

Special Issue

Local Antibacterial and Antimicrobial Drug Delivery Systems

Message from the Guest Editor

Antibiotic resistance is a huge problem for society, and it is rising to dangerously high levels in all parts of the world. New treatments are constantly sought in order to successfully fight against microbial infections and biofilms and avoid the development of resistance. In addition to new drug molecules and new action mechanisms, novel local drug delivery systems are being developed that enable the improvement of the specificity and bioactivity of antibacterial/antimicrobial agents and reduction of the probability of possible side-effects.

This Special Issue aims to cover different aspects of the development of local antibacterial and antimicrobial drug delivery systems, and will include papers describing the design, preparation, and characterization of these systems and the latest developments in this field. Production scale-up and the sterilization of drug delivery systems require a great deal of attention. New and promising strategies that allow antibacterial/antimicrobial therapies and patients' quality of life to be improved are specifically welcome. Authors are invited to submit original research articles and reviews in this important and exciting research field.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
