# Advances in the Delivery of DNA and RNA Therapeutics to the Eye

## Message from the Guest Editors

The eye is an appealing target organ for DNA- and RNAbased therapies. The eye is enclosed and relatively immune privileged due to an efficient blood-retina barrier and little lymphatic drainage. Viral-based vectors are currently the most promising option for gene replacement in the treatment of inherited retinal diseases. Viral vectors, however, require invasive subretinal injections, and concerns related to their safety, repeated dosing, and large-scale production have been only partially addressed. For this reason, nonviral alternatives should be considered and explored. Research in this field has expanded to find solutions for prolonged expression of therapeutic proteins or gene silencing in the treatment of more common non-genetic retinal diseases. Other research efforts include the development of delivery strategies that allow the retinal administration of DNA and RNA therapeutics via less invasive routes, such as intravitreal, periocular, or systemic delivery.

This Special Issue aims to highlight the current progress in ocular delivery of DNA and RNA therapeutics.

## **About the Journal**

## Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
