

## Special Issue

# Application of Drug Penetration or Delivery in the Fight against Infectious Diseases

### Message from the Guest Editor

Infectious diseases have never been more popular than they are today. Concern, especially regarding bacterial resistance, has alerted the world. In recent years, more precisely in 2017, WHO developed a list of 12 main pathogens and more mycobacterium tuberculosis as an urgency in the development of new antibiotics.

Nanotechnology is an efficient and very current tool, with several applications including infectious diseases. In this topic, we will address the application of drug penetration or delivery in the fight against infectious diseases. We will accept reviews, research papers and communications. Research papers should be as comprehensive as possible—communications are also acceptable, while letters and short research papers are not.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
